

Eight Simple Steps to a Great Community Education & Tree Planting Program

1: Make the Commitment

Because "Healthy Communities Grow on Trees," we need more of them.

2: Select Your Date

Allow time to organize, publicize and energize your community

3: Select Sites

School yards, public parks, street medians, downtown sidewalk cut-outs

4: Raise Some Money

You may be able to get trees donated, but you may have to buy some, too.

5: Identify Key Partners & Volunteers

Students, service organizations, local environmental groups, businesses, etc.

6: Find the Best Trees for Your Community

Work with the partnership for professional guidance & planning

7: Tell the World

Use local newspapers, radio, TV, and all your friends to get everyone involved

8: Plant Lots of Trees

Work with the partnership to plan and organize your professional, regional & collaborative, program - from concept to trees in the ground!

Since 2007 the United Voices for Healthier Communities partnership has supported the planting of over 12,000 trees across California! We're ready, willing and able to help everyone wanting cleaner, safer, & healthier California communities to build a great event.
